

Download Airbath International Manual

Our ZT-1-BGS-DPU BigGrid™ AirBath features a big 16-square inch (110 sq. cm) preheating grid with 1,500 watts of power, plus 50 CFM (1,415 liters per minute) of air supply for preheating and cooling. Introduced in 1998, this is the second largest AirBath™ from the recognized pioneer and world leader in PCB preheating technology. The Originals! No One Knows More About PCB Preheating than Zephyrtronics With Our Trademark Pyramidal Designs! AIRBATH™ PREHEATING SYSTEMS Your Hight Quality Solution for SMD, BGA & PCB Lab Design, Rework & Repair & PCB Preheating. Featuring Our PostCoolers™ Bottom-Side Preheating at the Bench for PCB Rework & Repair of SMT, BGA, CSP, QFP & Thru-Hole Chips ALL PRE-HEATERS ARE NOT CREATED ...SMD Rework equipment, soldering, de-soldering tools and stations, solder supplies by our on-line shopping cart. Metcal, Oki, Pen-Vac, Zephyrtronics AirBath preheating systems, bga and qfn and smd rework systems, solder paste, flux, low melt desolder wire alloy removes chip quick and easy, dispensers, RoHS compliant lead-free rework, preheaters, hot air tools, hot air pencils and fume ...The ZT-3 has 10 inches of mercury in vacuum and an open air flow of about 2 full liters per minute. No Buttons to Press! Let's be brutally honest: There is nothing more awkward, or that complicates the process of lifting and manipulating tiny parts, if you also required the added burden pressing a button to start or stop the vac
