

# Download Microsoft Excel Theory Question Paper

In Microsoft Excel, Row Height is set as 15. What is the unit of 15? Is it inches, centimeters, etc.? I am trying to compare the height of the rows to a sheet of paper before I print it out. I would like to get the sum of all the numbers inside the parentheses. Example: RIZA SMITH (2A/1C) LANIE ADAMS (2A) STEVE ANDREWS (1A/3C) In this case,  $2 + 1 + 2 + 1 + 3$  yields a total of 9. Microsoft BI Labs went live today featuring a look into the future of SQL Server Data Mining in the Cloud. The SQL Server Data Mining team presents a set of prototype web services in the cloud that mirror some of the great predictive analytics functionality available in the Table Analysis Tools for Excel add-in from the SQL Server 2008 Data Mining Add-ins for Office package. Don't quite understand you, DATEVALUE() convert a STRING to DATETIME. It doesn't convert a DATETIME into number. In Excel, DATETIME and number is inter-changeable. You only need to change the display format for a date and it can be shown as number (and vice versa).
